The Dynamic Walker

meywalk 4 medium & large

Maximize Your Mobility

Meywalk 4 offers the user a higher quality of life by allowing participation in everyday activities, and to be able to make conscious decisions.

The Meywalk 4 suspended spring system stimulates the muscles and movements associated with a natural gait pattern. The upper part of the frame follows the user's movements and provides optimal support during the various phases of gait.

A new feature on Meywalk 4 is the dynamic saddle seat which also follows the users movements. The rubber suspended saddle seat allows a certain degree of hip rotation during gait, the seat follows the sideways movement of the hips. During the movement patterns the user is always brought back gently to a neutral starting position.

Customise and /or adjust your new Meywalk 4 without the use of tools

New features abound in the new Meywalk 4

Maximum user weight rises to 130 kg, standard features include new rubber suspended saddle seat, drag brakes with a non reverse function and front castor locks
